

IMPLEMENTING ELECTRONIC GOVERNMENT RETURN 2006 (IEG6)

"Meeting the targets for e-government"

1

Name of Authority: Rochford District Council

IEG Contact Name: Sarah Fowler

Email: Sarah.Fowler@rochford.gov.uk

Telephone No: 01702 318135

Submitted date: 06/04/2006

Local Context

Rochford Council's vision for the District is 'to make Rochford the place of choice in the County to live, work and visit'. It also sees itself as the 'green' part of Thames Gateway South Essex.

The Council has adopted six principal aims to help realise the vision as follows:-

* to provide quality, cost effective services

* to work towards a safer and more caring community

- * to provide a green and sustainable environment
- * to encourage a thriving local economy
- * to improve the quality of life for people in our District
- * to maintain and enhance our local heritage.

The Community Strategy provides a shared long term vision for the District and this fits closely with the District's own aims.

The e-government strategy will play a key role in delivering this vision. E-government will enable the provision of seamless and comprehensive services that are accessible by all sections of our community. Whilst telephones and the website will be the major channels for the delivery of these services, the Council will ensure that technology is used to enhance our communication and service provision across the board, including for those in the community who require personal contact. We will implement proven and affordable e-government solutions that meet service delivery and business needs, in a staged manner proportionate to our capacity to delivery. The key achievements of our e-government programme to date are as follows:

* introduction ofonline payments for allincome streams (including council tax, business rates, housing rents andcar park penalty notices) thereby providing more choice for residents as well as efficiencies in service delivery

* re-launch of thewebsite with improved content, search engine and A-Z which has achieved the SOCITM 'Content Plus' rating. The website also offers online forms to report issues such as comments, compliments and complaints, environmental reportingand online consultation

*online public access to details of planning applications, previous planning decisions, property history, GIS(geographic information system) map based information and refuse and recycling collection days via the website

*connection to the Planning Portal to make the submission of planning applications possible online

*ability to make building control applications online

*availability ofCommittee minutes and agendas online so that our residents can find out more easily about the decisions made and details of their local councillor

*ability to register via the website as an 'e-citizen' to view certain personal bills and accounts

* installation of PCs in our sheltered schemes to provide internet access for residents and the provision of a mobile benefits service

* introduction of an online job advertisement and application facility

*an automated telephone response to the registration of electors annual canvass

*publicly accessible internet terminals in our reception buildings

* extension of the corporate land and property database to environmental health which will include the introduction of an online licensing service

*implementation of e-procurement through the Essex Marketplace, with some limited savings in purchasing (as predicted in the business case) and achievement ofa Public Service Agreement target to encourage small and medium sized enterprises to trade electronically * improvedIT infrastructure to support new ways of working such as home, mobile and remote working

* connection to level 3 of the National Land Information Service (NLIS).

As a small District, the Council recognises that it needs to work in partnership with others to achieve the full benefits of e-government. The Essex Online Partnership (EOLP) is key in this, both to provide seamless services for all our residents and to deliver efficiencies in service delivery. The EOLP consists of all District and Borough Councils, the County Council, Essex Police, Essex Fire and Rescue and the Strategic Health Authority. Through the EOLP the following have been achieved:-

* the Essextranet, a secure network to transfer data between partner organisations

* the Essex Trust Charter, via which data sharing protocols are being developed between partners

* the Essex Marketplace e-procurement initiative

* the Essex Broadband Partnership, to stimulate and encourage the take up of Broadband

* 'Connect Direct' - a project that has integrated the telephone networks of partner organisations via Featurenet so that a citizen can be transferred seamlessly to the relevant authority if the enquiry cannot be answered at the initial point of contact.

In terms of the future e-government service transformation programme the Council will ensure the corporate implementation of electronic document records management and a customer relationship management (CRM)solution. The Council's timescale for the implementation of CRM is outside that specified by the priority outcomes in that the timetable for implementation takes until March 2007. However, the Council believes that this is realistic and achievable given the available capacity.

Planned developments in the more immediate coming months include -

*the development of the business element of our website to meet the needs of businesses in our area

* working with Parish Councils to enable the electronic exchange of information

* the further development of mobile working in the Revenues and Benefits service and introduction in other areas such as Planning and Building Control * continued work to implement the single corporate property database. The Council will also be working on the implementation of Government Connect in partnership with the EOLP in accordance with the direction set by the Essex Chief Executive's Association (ECEA). The ECEA has tasked the EOLP to construct a business case for Government Connect, based on the provision of better services for Essex residents and supporting targets such as the Gershon efficiency savings.

The e-government programme is a key contributor to the corporate efficiency programme, with more gains anticipated from the introduction of CRM and Government Connect in the longer term. Opportunities such as that provided by the Essex secure network and 'thin client' technology for remote working, that have enabled Chelmsford Borough Council to provide the NNDR service for Rochford, thereby utililsing their experienced staff but stillproviding a seamless service for Rochford residents, will be pursued.

With plans for the provision of the necessary infrastructure in place, priority will turn to the promotion of the take-up of e-services, and in doing this the Council will learn from the experience of EOLP partners and national initiatives. E-services are already increasing in popularity as can be seen from the figures for usage of the website, and this combined with the high level of reliability of internet services will assist public confidence in using online services.

The Council is keen to ensure that technology is used to improve services for allthe community, includingthose who require personal or telephone contact. In doing so, the Council will build on existing services such as provision of internet terminals in public reception areas, PCs in sheltered schemes, and a telephone contact centre with extended opening hours for all revenues and benefits enquiries.

Note to Section 3 - Best Value Performance Indicator (BVPI) 157 As reported in IEG4, this Council is now using the esd-toolkit to record BVPI 157. As a new user of the toolkit at that time, there are zeros for performance in the historic years of the table.

Section 1 - Priority Outcomes (self-assessment) Satisfactory progress towards delivery of the listed priority outcomes listed below is required within the remit for achieving e-government by 2005. See http://www.odpm.gov.uk/index.asp?id=1002882&PressNoticeID=1546 and http://www.idea.gov.uk/knowledge.

G25 Facilities to support the single notification of a change of address, i.e. a citizen should only have to tell	Green 01/09/2005	Green 01/09/2005
the council they have moved on one occasion and the council should then be able to update all records relating to that person to include the new address.	Comment: The Council has implemented a connection to iammoving.com.	
If already 'green' on R27, R28, R29, G24 & G25 above please comment on	Comment:	
E19 Agreed baseline and improvement targets for the percentage of public enquiries about council services resolved at first point of contact and efficiency savings resulting from investment in customer relationship management and workflow technology.		
Otherwise you may leave this row blank.		

Section 2 - Change Management (self-assessment)

Authorities are asked to provide information on advisory good practice outcomes relating to the internal organisation and management practices of the council that are required to help deliver the people, systems and service management changes necessary for e-government. Information supplied here will be used to inform national policy, but does not fall within the remit of the December 2005 target.

Change Management Area	Status at 31/12/2005	Status at 31/03/2006	
• Appointment of people to the following key local e-government functions in your Council (see http://www.idea-knowledge.gov.uk/idk/aio//206757):			
i) Member & officer e-champions	Green 01/06/2002	Green 01/06/2002	
		Comment: The Member e-champion is Cllr C. Hungate. The Head of Administrative and Member Services is the officer e-champion.	
ii) e-government programme manager	Green 01/06/2002	Green 01/06/2002	
	Comment: The Head of Administrative and Member Services occupies this role.		
iii) customer services management	Green 01/06/2002	Green 01/06/2002	
	Comment: The Head of Administr occupies this role.	ative and Member Services	
• Inclusion of competency development of the above key functions and training for staff affected by e-Government	Green 31/03/2005	Green 31/03/2005	
projects, within the Council's workforce development planning (for more information about the e-capacity Building Programme see http://www.lamip.org/MicroSites/eCapacityBuilding/Pages /TemplateUser.aspx?PageType=StandardContent&XSL= standardcontent&Key=1)	Comment: The Workforce Develo Development Review Scheme en development opportunities are av	sure that appropriate training and	
• Establishment of an e-delivery programme board	Green 01/06/2002	Green 01/06/2002	
	Comment: The Operational Management Team (OMT) performs this function.		
• Use of formalised programme & project management methodologies (e.g. PRINCE2, MSP) to support	Green 01/12/2003	Green 01/12/2003	
e-delivery programme	Comment: PRINCE2 has been adopted as the formal project management methodology and key staff have been trained in its application. The principles are used for managing major projects, whilst other projects follow a service action plan process.		
 Documentation/agreement of corporate risk management strategy for roll-out of local e-government, 	Green 31/12/2005	Green 31/12/2005	
including regular review of risk mitigation measures	Comment: The corporate risk register and departmental risk registers identify the risks for the roll-out of e-government. The OMT reviews progress (including risk) on a regular basis.		
Use of customer consultation/research to inform development of corporate e-government strategy	Green 31/12/2005	Green 31/12/2005

Section 4 - Access Channel Take-Up

In order to demonstrate public take-up of the main e-access channels that you are investing in, you are asked to complete the table below detailing actual and forecast figures for numbers of e-enabled payment transactions and change of address notifications. Planning authorities should also complete the Local Service Website line for planning applications. It is important that e-access channel investment and rollout also facilitates accompanying improvements in the corporate management capability required to monitor and collect such statistics. Click on the light bulb icons for industry definitions of page impressions and unique users.

		Actual		Forecast

Section 5 - Local e-Government Implementation Expenditure

Councils are asked to provide a summary of current and forecast expenditure on implementing electronic government up to 2007/08. This should include the standard elements in the table below and brief commentary on the use of IEG money. For 2005/6 onwards, please include best estimates of revenue and capital expenditure even though the council may not yet have officially approved the budgets. (Please note that implementing e-government expenditure refers to investment designed to e-enable local services and to transform their accessibility, quality and cost-effectiveness in line with the 2005 target. Cyclical spend related to the maintenance of the existing ICT infrastructure should not be included):

	В	ackward Look (£)	Forward	Look (£)
